

Professional Research Assistant position: Neurobiology of Behavior and Behavioral Evolution

The **Fischer Lab** is seeking a professional research assistant starting **August 2024**. This position is a combination of research, lab management, and animal care. Our lab uses charismatic frogs as a model system to understand how the brain makes behavior and how behaviors evolve. Learn more at ekfischerlab.com.

The lab will be moving to the **University of California Davis** in summer 2024. UC Davis has a strong research communities in animal behavior and neuroscience, with frequent opportunities to interact with other lab groups.

Qualifications an undergraduate degree in Biology or related field, with previous research experience. Willingness to work with live animals is required. Experience with molecular bench work (e.g., DNA/RNA extractions, PCR), immunohistochemistry, and/or genomics/bioinformatics preferred.

Position will be for 1-2 years, renewed annually, with possibility of extension. **Salary** starting around \$50K + benefits.

To apply, please submit a cover letter and CV. The cover letter should be max one page, discussing your previous experience, current interests/goals, and motivation for applying. Please also include the names and contact information for 2-3 references. Applications will be considered until the position is filled.

For questions and to submit your application, please contact Eva Fischer (ekfischer@ucdavis.edu).
